Proposal New integrated pan-Powys Model of Care to be piloted in north Powys

Outline Summary / Description of Proposal

This Impact Assessment has been used as a joint Impact Assessment between PCC and PTHB and will be used to report to both sovereign bodies.

This model of care for Powys is part of a Wales-wide response to the increasing demands and new challenges facing the NHS and social care. These include an ageing population, lifestyle changes, public expectations and new and emerging medical and digital technologies.

In June 2018, the Welsh Government published ‘A Healthier Wales: Our Plan for Health and Social Care’. The ambition of A Healthier Wales is for the health and social care systems to work together, to help people live well in their communities, meet their health and care needs effectively and provide more services closer to or at home, so that people only need to use a hospital for treatment that cannot be provided safely anywhere else.

The new model of care sits under the overarching *Health and Care Strategy for Powys: A Healthier, Caring Powys*. We asked the local community and people who provide services, both in and out of the county, to tell us ‘what works well’ and ‘what could be improved in the future’.

To help focus our conversations we looked at how we deliver services in three distinct ways:

- At home and in the community
- At a district or regional level
- At a county or out of county level.

We have initially focused conversations in north Powys and have discovered people are enthusiastic about transforming health and care services in north Powys, in part by delivering more services in-county, closer to where people live.

In developing the model of care we took care to keep a balance between ambition and reality. This will help us deliver meaningful change, within the boundaries of what we can realistically achieve. As we develop more detailed plans, we will continue to share information, ask for feedback and explain the reasons behind our decisions.

Cyngor Sir Powys County Council

Impact Assessment (IA)

The integrated approach to support effective decision making

1. Version Control (services should consider the impact assessment early in the development process and continually evaluate)

Version	Author	Job Title	Date
0.1	Sali Campbell-Tate	Project Manager	17 February 2020

2. Profile of savings delivery (if applicable)

2018-19	2019-20	2020-21	2021-22	2022-23	TOTAL
£	£	£	£	£	£

3. Consultation requirements

Consultation Requirement	Consultation deadline/or justification for no consultation
No consultation required (please provide justification)	There is no consultation required at this stage. However, there may be a requirement for formal consultation during the next stage of work where we will be undertaking more detailed design work that will look at new service models, pathways and service specifications that are needed to deliver the model.

4. Impact on Other Service Areas

**Does the proposal have potential to impact on another service area? (Have you considered the implications on Health & Safety, Corporate Parenting and Data Protection?)
 PLEASE ENSURE YOU INFORM / ENGAGE ANY AFFECTED SERVICE AREAS AT THE EARLIEST OPPORTUNITY**

Until further detailed design is undertaken on the model of care, the impact on other services is unknown however is anticipated to be positive. A stakeholder management plan is in place alongside a Communications and Engagement Plan, which ensures stakeholders and key personnel are engaged throughout the process.

5. How does your proposal impact on the council's strategic vision?

Council Priority	How does the proposal impact on this priority?	IMPACT Please select from drop down box below	What will be done to better contribute to positive or mitigate any negative impacts?	IMPACT AFTER MITIGATION Please select from drop down box below
<p>The Economy We will develop a vibrant economy</p>	<p>People in north Powys benefiting from a strong economy is one of the indicative outcomes that the programme seeks to achieve.</p> <p>The model of care seeks to enhance economic stability in Powys through developing the local health and social care service offer which will enhance leadership, training and employment opportunities, increase volunteering in the community and support continued professional development.</p> <p>Returning services closer to home will increase footfall across north Powys and therefore contribute to economic growth across the region. It will also increase the opportunities for skilled employment within north Powys.</p>	<p>Good</p>	<p>To be developed during more detailed design of the model of care.</p>	<p>Choose an item.</p>

<p>Health and Care We will lead the way in effective, integrated rural health and care</p>	<p>The model of care is leading the way locally in Powys around how we will deliver an effective integrated rural health and care system in the future. The model is based on a partnership approach across multi-agency and multi-disciplinary teams with individuals, families and communities.</p> <p>Specifically, the new model of care will:</p> <ul style="list-style-type: none"> • Adopt a more co-ordinated strengths-based approach across multi-agencies with integrated working to support people through a seamless health and care service with “what matters” at the heart of the conversation. • Offer a multi-agency integrated approach to primary prevention and early intervention across multi-agencies supporting universal and targeted services, e.g. childhood obesity through more joined up working and integrated community hubs with one stop services, combining education, welfare, housing, leisure, health, social care and third sector. • Support more integrated working in primary and community care with secondary care providers to enable more enhanced services to be delivered in Powys. • Enhance focus on wellbeing, early help and support. Residents are encouraged to maximise the use of their natural surroundings and green space to develop and maintain good health and wellbeing for themselves and their families. They will be able to access early help and support services in a timely and effective way. 	<p>Very Good</p>	<p>To be developed during more detailed design of the model of care.</p>	<p>Choose an item.</p>
---	---	------------------	--	------------------------

	<p>There are strong areas of focus throughout the model in relation to technology and digital applications, and how these can be maximised to keep people safe and well, living independently at home for as long as possible where safe and appropriate to do so. The use of technology and digital applications assists in eradicating inequity of provision and increases accessibility to services.</p> <p>There is recognition of the importance of the first 1000 days of a child's life, and the model of care aims to incorporate activities that help children to develop resilience as they move towards adulthood.</p> <p>Development of more local accommodation provision will ensure fewer children looked after are placed out of county, away from their home communities and support networks and access to appropriate accommodation for people with complex needs.</p> <p>A focal point of the model of care is integration and multi-agency working, aiming to provide seamless care to people to ensure they receive the right support at the right time, giving young people, adults and families a fully integrated experience of health and care. Integrated teams will be accessible via a one-stop call centre. Provision of one-stop, universal and targeted early and primary prevention services at integrated community hubs that bring together education, welfare, housing, leisure, health, social care and the third sector.</p> <p>One of the priorities identified in the Health and Care Strategy was tackling the 'Big 4' diseases (mental health, cancer, circulatory, respiratory). The model of care seeks to achieve that by encouraging people to reduce behaviours that contribute to incidences of the</p>

The integrated approach to support effective decision making

Principle	How does the proposal impact on this principle?	<u>IMPACT</u> Please select from drop down box below	What will be done to better contribute to positive or mitigate any negative impacts?	<u>IMPACT AFTER MITIGATION</u> Please select from drop down box below
<p>Prevention: <i>Understanding the root causes of issues to prevent them from occurring.</i></p>	<p>The focus on prevention is a fundamental cornerstone of the ambitions for the North Powys Wellbeing Programme and more specifically the model of care.</p> <p>The preventative vision was initially embedded in the Health and Care Strategy through a focus on ‘Start Well’, ‘Live Well’ and ‘Age Well’. The model of care asks people in Powys to be proactive in supporting their own health and wellbeing, and be experts in managing their own care. They will be empowered to do so through improved accessibility utilising digital technology to maximise this.</p> <p>The location of the Rural Regional Centre has been carefully considered to ensure future service provision provides greatest preventative impact to the community. Newtown was identified as a geographical hotspot in both the Population Wellbeing Assessment for north Powys and the burden of disease analysis undertaken by Public Health.</p> <p>The use of robust joined up data has helped to understand need and to ensure services are focused on prevention.</p> <p>The North Powys Wellbeing Programme has identified the Third Sector as a key partner in its preventative approach.</p>	<p>Very Good</p>		<p>Very Good</p>

Cyngor Sir Powys County Council
Impact Assessment (IA)

The integrated approach to support effective decision making

<p>Integration: <i>Taking an integrated approach so that public bodies look at all the well-being goals in deciding on their well-being objectives.</i></p>	<p>The model of care is an integrated model between Powys County Council and Powys Teaching Health Board, bringing together a number of statutory services on one site. There is a joint commitment from both sovereign bodies to implement this model of care in an integrated way, to provide seamless health and care to our residents.</p> <p>The genesis for the North Powys Wellbeing Programme is the Powys Regional Partnership Board's Joint Health and Care Strategy which also supports step 11 and 12 in the Public Service Board's well-being plan, the Council's Vision 2025 Corporate Improvement Plan and the Health Board's Integrated Medium Term Plan.</p> <p>The North Powys Wellbeing Programme has considered the wider health benefits of the programme by aiming to secure economies of scale in a rural context by bringing together a number of services.</p> <p>The North Powys Wellbeing Programme have held initial discussions as to the broader benefits across the national goals and will continue to work with stakeholders as part of the business case development. Areas covered include how the programme links with wider regeneration of the town and reducing mileage for people travelling which includes the financial impact for individuals as well as carbon emissions.</p>	<p>Good</p>		<p>Choose an item.</p>
<p>Preventing Poverty: Prevention, including helping people into work and mitigating the impact of poverty.</p>	<p>The recognition of the wider determinants of health is poignant throughout the model of care, all of which can potentially influence poverty.</p>	<p>Good</p>		<p>Choose an item.</p>

Principle	How does the proposal impact on this principle?	<u>IMPACT</u> Please select from drop down box below	What will be done to better contribute to positive or mitigate any negative impacts?	<u>IMPACT AFTER MITIGATION</u> Please select from drop down box below
	<p>The model of care pledges to influence housing, education, leisure and in-work poverty to reduce health inequalities.</p> <p>Provide one-stop, universal and targeted early and primary prevention services at integrated community hubs that bring together education, welfare, housing, leisure, health, social care and the third sector.</p>			
<p>Unpaid Carers: Ensuring that unpaid carers views are sought and taken into account</p>	<p>No direct impact identified at this stage.</p>	<p>Neutral</p>	<p>During the next stage of detailed design of the model of care, give consideration to the role of unpaid carers and recognise the importance and value of those people, whilst continually engaging to obtain their views.</p>	<p>Good</p>
<p>Safeguarding: Preventing and responding to abuse and neglect of children, young people and adults with health and social care needs who can't protect themselves.</p>	<p>The model of care has further emphasis on early help and support for children and families, giving focus to the importance of the first 1000 days of a child's life and early intervention to protect them from harm. The model also includes the development of a multi-agency safeguarding hub (MASH).</p> <p>The multi-agency nature of the model of care will provide joined up working between key statutory partners on a co-located site, breaking down barriers that currently exist in respect of information sharing. This will allow knowledge of vulnerable children, families and adults to be shared across relevant disciplines and timely intervention to take place.</p>	<p>Good</p>		<p>Choose an item.</p>

Outline Assessment (to be inserted in cabinet report)	Cabinet Report Reference:	
--	----------------------------------	--

The North Powys Wellbeing Programme represents a once in a generation opportunity to shape the health and wellbeing of the population over the long term while transforming social and healthcare service delivery in the short to medium term. The programme is fully aligned with the *Wellbeing of Future Generations (Wales) Act 2015* and has at its core *A Healthier Wales – Our Plan for Health and Social Care*. Furthermore, the underlying narrative and principles used to formulate that plan come directly from the *Health and Care Strategy for Powys – the joint strategy formulated by Powys County Council and Powys Teaching Health Board* after considerable engagement with a wide range of stakeholders.

Key to delivering a healthier population will be addressing the social determinants of health; education, relative poverty and, the living and working environment. Sustained investment in these areas will result in considerable health benefits which will reduce demand for social and health care services in the future. This will not only save financial resource but will also enable further reorganisation of services so that they can be more tailored to the needs of those that become unwell but are also more convenient to access which will reduce the carbon footprint of service delivery. It must be remembered, however, that the investment in these areas must be sustained and will not result in quick wins. In addition, within the context of health, education must be seen as the area where the greatest return might be expected. Investing in our children now will affect three generations; the parents of those children who, evidence suggests, can be influenced by their children, the children themselves and their children in the next generation. Relative poverty and the living and working environment are also known to impact on health and consumption of social and health care services.

In the short to medium term, there is also a considerable amount of change that will enhance the quantity and range of social and health care services. Evidence here also suggests that the Social Return on Investment in social care and services will generate downstream savings in health care service delivery so we must transform our thinking and attitudes away from a health care centric focus onto a community and council centric focus. Key to delivering more capability and capacity in the community will be the use of technology and the harnessing of community effort through, principally, the third sector and particularly the voluntary sector. Initial public engagement suggests that, for our more rural communities, there is a willingness and ambition to be self-sufficient, but the enabling infrastructure is not available. Maximising the utility of this real estate closer to communities will enable services to be pushed further out into the communities which will enable more convenient access to service users and may enhance accessibility to those with disability.

Where community capability and capacity cannot be generated, there will be a requirement for regulated services to be put in place as close to the home as possible. While this represents considerable challenge, there is much already in place that could be transformed to support a “closer to home model” of service delivery. There is a wide range of real estate currently available. Some can be re-worked to make it fit for modern purposes; some might not be but the location would make it ideal for redevelopment. Some real estate could neither be repurposed nor redeveloped and should be part of a real estate rationalisation that could bring back into the area additional resource through sale of the assets.

There is already a cohort of committed, regulated, service providers in both the social and health care arenas. There is already the ambition to bring these providers closer together in order to enable the development of “one stop shops” enabling service users to maximise the expertise that is available to manage their problems. However, there is still more to be done as we seek also to bring the third sector into these care hubs. However, there is also a recognition that the people proposition needs to change along with an attitudinal shift that will see new providers brought into the multidisciplinary team that will enable, through effective triage, the service user to be directed at the first opportunity to the right person with the right skills to manage the problem rather than waiting, under the current model, to see the most highly trained, experienced and skilled provider whose full range of ability might not be necessary for the client at the time of presentation.

This change in the people proposition will enable Powys to progress towards achieving its ambition of building a training academy that will enable local people to access training and education locally. This will, in some way, address the current reality that sees younger people having to leave Powys to achieve their ambitions. Enabling people to live and train closer to their social roots will encourage them to stay. Within this context there is also the opportunity to link this academic centre to the Welsh language agenda by providing a significant proportion of training in the Welsh medium.

Even after we have exploited all the opportunities to maximise health and wellbeing, build individual and community capacity, capability and resilience and re-invested in social services delivery, people will still continue to require health care services to be available to deliver the widest range of services. While the greater part of GP service delivery will be mandated through the General Medical Services Contract there is still a great deal of change that can be effected through development of locally enhanced services, enabling the development of health board infrastructure to deliver a wider range of services, exploiting digital opportunities and re-patriating services that are currently delivered out of county.

The changes to service delivery will enable a wider range of services to accessible closer to home which will have a positive impact on user satisfaction as well as reducing the carbon footprint of service delivery and enhancement of local economies.

11. Is there additional evidence to support the Impact Assessment (IA)?

What additional evidence and data has informed the development of your proposal?

- North Powys Population Wellbeing Assessment
- Case for Change
- Staff, public, GP and wider stakeholder engagement
- North Powys service mapping
- Model of Care work stream outputs
- National policy and legislation drivers
- Evidence base
- Horizon scanning for changes to emerging technology particularly miniaturisation, ruggedisation and machine learning/AI to deliver a wider range of diagnostics closer to home with more rapid and accurate reporting.

12. On-going monitoring arrangements?

What arrangements will be put in place to monitor the impact over time?

Please state when this Impact Assessment will be reviewed.
